

## Our products / Protection against direct effects of lightning

### > Equipotentiality connection >

#### ■ Spark gap

Equipotentiality spark gaps to secure the balance of equipment potentials, the metallic structure and flow of static loads. Surge divesters ensure both balance of potentials on equipment and metal structures and absorption of electrostatic discharge. For instance on roof support, pipelines, protection of insulation joints...

- 23503/20002

Ref	Name	Nominal voltage	Nominal discharge current	Maximal discharge current	Weight
23503	Equipotentiality spark gap	350 V	10 kA	25 kA	530 g
20002	Antenna surge arrester	200 VDC	25 kA	25 kA	120 g
